

Level Mount Rated #1 According to Top Ten Reviews™

Bannockburn, IL – October 27, 2011 - The Level Mount DC50CDM was rated as the best TV wall mount by the tech review website, Top Ten Reviews™. Beating out some of the better-known brands in the industry, the review was based on four criteria; **Specifications, Ease of Installation, Features and Help & Support** for which, Level Mount received perfect marks in all categories. **Specification:** TV size and weight capacity are the main subjects of this section and the review highlights Level Mount's sturdy construction, and ability to fit a wide assortment of TV brands. Also mentioned is the mount's sleek profile which attaches the TV a mere 2.5" from the wall.

Ease of Installation: Level Mount positions itself as the only mount manufacturer that provides everything needed for an easy installation; thereby eliminating a trip to the hardware store or call to customer service for additional parts. The review points out this unique convenience and awards a perfect four-star rating because of it.

Features: The site also mentions that the features of the mount are what set Level Mount apart from the other brands. The hardware that allows for universal TV attachment, its adjustability, cord management options and the fact that Level Mount's products meet the safety standards of UL, are just some of the attributes detailed in the evaluation.

Help & Support: It is pointed out that this is another aspect of Level Mount's customer experience which differentiates it from the other brands. Level Mount offers assistance 24 hours a day, seven days a week through a bi-lingual phone support line or with helpful information on its website. Additionally, the mounts carry a Limited Lifetime Warranty for manufacturer's defects and a Protection plan that covers the cost of a replacement TV for any damage caused by a defective mount.

In summary, all of these elements add up to a mount that far surpasses the competition. To read the full review, go to:
